

WATER SOFTENERS

The Allegheny

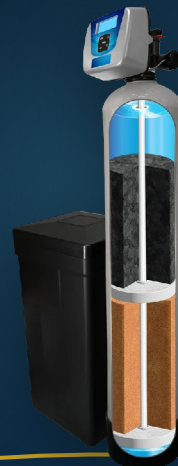

Softening and filtration in one tank

The Allegheny does it all in one tank. It softens and filters water for the entire home, for better-tasting, gentler water at every tap, without sacrificing performance: no extra systems, no unnecessary filter changes, just efficient, reliable water.

Advanced Construction

Clear Value Proposition

Dual Protection

IN SHORT

The Allegheny is the Three Rivers water softener with integrated filtration: activated carbon and high-capacity softening resin in one tank, in two sizes, softening and filtering water for the whole home at once. It is matched to your home after a free in-home water test and installed across the Greater Pittsburgh area.

KEY FEATURES

- ◆ **Activated Carbon:** Reduces chlorine to improve the smell and flavor of your water.
- ◆ **Softening Resin:** Captures calcium and magnesium hardness minerals protecting your home and body.
- ◆ **Salt Monitor Available:** Optional alert can be set to remind owner that salt needs to be added.

TWIN-TANK VARIANT

The Allegheny Twin

When it comes to complete coverage, turn to The Allegheny Twin. This twin-tank water softener with carbon filtration provides treated water constantly, even during regeneration cycles. Everything The Allegheny does, with a second tank.

SPECIFICATIONS

- ◆ **2 Sizes Available**, with **Advanced Technology**.
- ◆ **Two Medias**: activated carbon meets high capacity resin for twice the treatment.
- ◆ **Salt Monitor** and **Safety is Standard**: corrosion-free materials built to last, with sensors to prevent leaks.

Is The Allegheny right for your water?

Every recommendation starts with a free in-home water test. If your water does not need a system, we tell you that too. Installed by a local plumbing professional under contract with Three Rivers.
