

WATER SOFTENERS

The Confluence

Two tanks. Soft water around the clock.

When you need soft water on a busy schedule, The Confluence is our two-tank softener. You never wait for a regeneration, because a second tank is always ready. Its dependable design is a lasting answer to tough hard water.

Advanced Construction

Clear Value Proposition

24/7 Soft Water Delivery

IN SHORT

The Confluence is the twin-tank water softener in the Three Rivers lineup, in three sizes: when one tank is exhausted it switches to the second, so treated water keeps flowing, even during regeneration. It is installed across the Greater Pittsburgh area for busy homes that need soft water around the clock.

KEY FEATURES

- **Softening Resin:** Captures calcium and magnesium hardness minerals protecting your home and body.
- **Twin Tanks:** The first tank softens as much water as possible before automatically switching to the second tank, creating a continuous stream of treated water while the first tank regenerates.
- **Advanced Operation:** Predicts water usage habits to provide efficient softening power.

TWIN-TANK VARIANT

The Allegheny Twin

When it comes to complete coverage, turn to The Allegheny Twin. This twin-tank water softener includes carbon filtration to tackle harsh chlorine issues. It is a strong answer to city water complaints.

SPECIFICATIONS

- ◆ **3 Sizes Available.**
- ◆ **Double-Duty Softening:** twice the capacity, continuous treatment.
- ◆ **Salt Monitor and Efficient Operation:** automatically switches tanks and regenerates.

Is The Confluence right for your water?

Every recommendation starts with a free in-home water test. If your water does not need a system, we tell you that too. Installed by a local plumbing professional under contract with Three Rivers.
