

WATER FILTERS

The Forge

The clear answer for challenging well water

When water problems go beyond the basics, you need a system that responds efficiently. The Forge is our advanced air-injected filtration system, enhanced with ozone to dramatically reduce bacteria growth in the tank. It uses air to turn dissolved contaminants into solid particles that can be easily captured.

Advanced Construction

Fast-Acting Media

Chemical-Free Bacteria Prevention

IN SHORT

The Forge is the advanced air-injected filtration system in the Three Rivers lineup, enhanced with ozone to dramatically reduce bacteria growth in the tank. It comes two ways: The Forge Iron for dissolved iron in well water, and The Forge HS for hydrogen sulfide, the rotten-egg smell. Three Rivers installs both across the Greater Pittsburgh area.

TWO BUILDS, ONE FOR EACH PROBLEM

- ◆ **The Forge Iron:** Customized to target dissolved iron in well water to naturally convert and remove.
- ◆ **The Forge HS:** Built to handle Hydrogen Sulfide gas and reduce the telltale sulfur smell in well water.

Two builds, one for each problem

SPECIFICATIONS

- ◆ **Ozone Generator:** creates a chemical-free cleanser to reduce bacteria growth in the tank.
- ◆ **Two Sizes Available** for each build, **Fast-Acting** media, and **Safety is Standard.**

Is The Forge right for your water?

Every recommendation starts with a free in-home water test. If your water does not need a system, we tell you that too. Installed by a local plumbing professional under contract with Three Rivers.
