

DRINKING WATER FILTERS

The Golden Triangle

Reverse osmosis with a built-in monitor

The Golden Triangle delivers purified drinking water from a clean, compact under-sink system. Its built-in TDS monitor watches the water as it is made, so you know when cartridges begin to let contaminants through and need replacing. The complete system includes a storage tank and dispensing faucet.

Advanced Construction

Microscopic Membrane Filter

IN SHORT

The Golden Triangle is the fully equipped reverse osmosis system in the Three Rivers lineup, with a built-in TDS monitor for real-time quality monitoring. It is installed under the sink with its storage tank and dispensing faucet, for Greater Pittsburgh homes that want to see when cartridges need changing.

KEY FEATURES

- **TDS Monitor:** Built-in sensor detects when cartridges begin to let contaminants through and need replacement.

SPECIFICATIONS

- **Real-Time Quality Monitoring:** built-in sensor with cartridge replacement indication.
- **LED Light Reminder** and **Compact Design** for under-sink installation.
- **Carbon Filtration, RO Membrane** and a **Dedicated Faucet**.

Is The Golden Triangle right for your water?

Every recommendation starts with a free in-home water test. If your water does not need a system, we tell you that too. Installed by a local plumbing professional under contract with Three Rivers.
