

WATER FILTERS

The Keystone

Balanced pH, protected pipes

Pure water is neutral, but its pH can slip on the way to your tap. The Keystone safely brings acidic water back toward neutral to protect everything downstream, with tank sizes and media strengths matched to your water.

Advanced Construction

Easy In-Field Servicing

Whole-Home Protection

IN SHORT

The Keystone is the acid neutralizer in the Three Rivers lineup, in two sizes: natural calcite media gently raises the pH of acidic water, with a calcite plus Corosex blend available for stronger correction. It is installed across the Greater Pittsburgh area to protect pipes, fixtures and appliances downstream from corrosive water.

KEY FEATURES

- **Calcite Correction:** Calcite media provides a gentle adjustment for mild acidity.
- **Calcite + Corosex Blend:** Extremely low pH water needs an extra boost with a more aggressive neutralization media. Multiple calcite plus Corosex mixes are available for stronger correction capabilities.

SPECIFICATIONS

- **Two Sizes Available.**
- **All Natural Media:** soft, rock-forming minerals dissolve to safely raise pH.
- **Power to Perform:** the media blend is tailored to match the pH of your water; **Safety is Standard.**

Is The Keystone right for your water?

Every recommendation starts with a free in-home water test. If your water does not need a system, we tell you that too. Installed by a local plumbing professional under contract with Three Rivers.
