

WATER SOFTENERS

The Monongahela Tannin

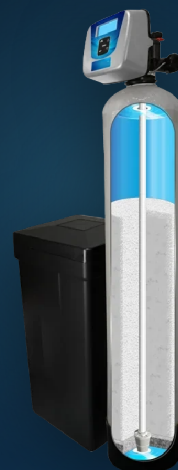

Clearer well water starts here

The Monongahela Tannin is our effective way to tackle stubborn organic compounds in well water. Tannins are a natural well-water issue, but you don't have to live with the musty odor and taste they create. It takes on the yellow/brown tint, earthy smells and staining with easy, low-maintenance operation.

Advanced Construction

Fast-Acting Media

Better Tasting Water

IN SHORT

The Monongahela Tannin is the Three Rivers answer to tannins in well water: a dedicated tannin resin captures the organic material behind yellow/brown tint, musty odor and staining. It is installed for well-water homes across the Greater Pittsburgh area after a water test confirms tannins are the problem.

KEY FEATURES

- ◆ **Tannin Resin:** Captures the organic material suspended in well water.
- ◆ **Advanced Technology:** Includes predictive water usage to automatically adjust cycles to match your habits.
- ◆ **Salt Monitor Available:** Optional alert can be set to remind owner that salt needs to be added.

Is The Monongahela Tannin right for your water?

Every recommendation starts with a free in-home water test. If your water does not need a system, we tell you that too. Installed by a local plumbing professional under contract with Three Rivers.
